

Appendix Table 1-31
High school graduates enrolled in college in October after completing high school, by demographic characteristics and institution type: 1975–2013

(Percent)

		Sex		Family income ^a			Race or ethnicity ^b				Parents' highest education ^d				Institution type	
Year	All graduates	Male	Female	Low	Middle	High	White	Black	Hispanic ^c	Asian	Less than high school	High school diploma or equivalent	Some college	Bachelor's or higher degree	2-year	4-year
1975	50.7	52.6	49.0	31.2	46.2	64.5	49.1	44.5	52.7	NA	NA	NA	NA	NA	18.2	32.6

NA = not available; S = suppressed, estimate unreliable.

^a Family income is categorized as follows: low income includes families in the lowest 20% of income distribution, middle income includes families in the middle 60%, and high income includes families in the highest 20%.

^b Due to the small sample size for racial and ethnic categories, data are subject to relatively large sampling errors. Therefore, 3-year moving averages are used to produce more stable estimates. The 3-year moving average is an arithmetic average of the rates in the year indicated, the year immediately preceding, and the year immediately following. For 1975 and 2013, a 2-year moving average is used. Data for 1975 reflect an average of 1975 and 1976, and data for 2013 reflect an average of 2012 and 2013. Starting from 2003, White, Black, and Asian data exclude persons identifying themselves as two or more races.

^c Hispanic may be any race. Asian, black or African American, and white refer to individuals who are not of Hispanic origin.

^d The highest level of education achieved by either parent.

NOTES: Includes students ages 16–24 completing high school in the survey year. Before 1992, high school graduates referred to those who had completed 12 years of schooling. As of 1992, high school graduates refer to those who have received a high school diploma or equivalency certificate.
